Better hot wheels id car scanning using NFC and improvements to Open GL management Fun game in the digital world. To update, purchase the portal and then track it update, endless problems but still working with mattel, track drop out, app that does not automatically populate the lay out of the track, found an adaptation problem with portal and booster, it may be wise to try the completed kit, I do not know, waiting for spare parts at a new set, to 200\$ and 2 months now I finally find the answer to the bug in the game, I tried to contact Mattel about it, he said to send an email, so here I am the last resort to get information for the developer, in the app, a mission or a challenge is the inventor of smart track, so if you follow the path, the house, the track, the challenge area, as mentioned, you go through the construction and the race but no credit, there is the problem, printing errors or misleading address, if you stay from home, track, free play on smart track, continues, continues, race... now if the portal sees at least the car will credit 1 point, ok well, at least we have a job done. Need more information? I hope it has been fixed in the next update! Our forums show that these issues have been fixed. We are pleased to have helped through our customer services team. Do not hesitate to contact us for further questions or doubts! Phone support is available at 800-524-8697. Mon-Fri, 9:00 a.m. to 6:00 p.m. est. nail the most acrobatics and win the most races? With Hot Wheels id, you can now try it. Hot Wheels id challenges you to challenge your limits, demonstrate your skills and measure your performance at every published speed, every stunt won and every race won.
